

# Launchpad for Language

A language enrichment programme supporting all children to reach their communication potential

Communication skills are a fundamental building block for life. Good speech and language skills help children to build a strong foundation for success in school.

Boosting children's language skills at an early age can help with subjects such as literacy and numeracy, as well as other important aspects of school life such as making friends and understanding rules and routines.

## The programme involves:

- Gathering information
- Training and supporting staff
- Information and support for parents
- Language boosting activities
- Support for children that need extra help.

If you have any questions about Launchpad for Language or your own child's speech, language and communication skills, please get in touch with your school SLT.
